MORE THAN SPORT

A practical guide to the installation, maintenance and long-term care of synthetic surfaces.

This handbook provides clear, practical guidance on the selection, construction, care and long-term management of synthetic surfaces, helping you achieve safe, durable and high-performing facilities.

SURFACE TYPES & APPLICATIONS

Different surfaces, different characteristics. Here's how each type performs and what to consider for long-term success.

3G INFILLED TURF SYSTEMS

Infilled systems use a combination of sand and performance infill (e.g. SBR rubber or cork) to provide stability, shock absorption and consistent performance, particularly for high-use sports such as football and rugby.

TYPICAL APPLICATIONS

- ✓ Football and rugby pitches
- ✓ Multi-use games areas (MUGAs)
- ✓ Schools and education facilities
- ✓ Community and leisure facilities

KEY CONSIDERATIONS

- ✓ Infill depth and type
- ✓ Regular grooming and top-up
- ✓ Drainage and contamination control
- ✓ Inspection of seams and playability

4G ENHANCED TURF SYSTEMS

4G systems are an evolution of 3G, using advanced fibres, improved backings and specialist infill combinations to enhance durability, playability and recovery, particularly for high-performance sports.

TYPICAL APPLICATIONS

- ✓ Football and rugby training areas
- ✓ Multi-sport and leisure facilities
- ✓ Schools and commercial sites

KEY CONSIDERATIONS

- ✓ Infill type and application rate
- ✓ Surface cleanliness and grooming
- ✓ Performance testing (where specified)
- ✓ Routine inspection and maintenance

5G NON-INFILL / HYBRID SYSTEMS

5G systems use engineered fibres and a stable backing structure without rubber crumb infill. They are designed to provide a natural playing experience and are commonly used for sports and leisure facilities requiring reduced infill management.

TYPICAL APPLICATIONS

- ✓ Football and rugby (training and play)
- ✓ Schools and leisure facilities
- ✓ Indoor and outdoor facilities

KEY CONSIDERATIONS

- ✓ Surface clean and debris removal
- ✓ Pile grooming and brush frequency
- ✓ Contamination control (leaves, soil, etc.)
- ✓ Inspection of seams and surface condition

OTHER SYNTHETIC SURFACES

A wide range of surfaces are available for specialist uses, each with unique construction, performance and maintenance requirements. These include hockey, padel, tennis, playgrounds, gyms, fitness areas and wet-pour systems.

TYPICAL APPLICATIONS

- ✓ Hockey and multi-sport surfaces
- ✓ Padel and tennis courts
- ✓ Playgrounds and recreation areas
- ✓ Gyms, fitness and sled tracks
- ✓ Wet-pour and EPDM systems

KEY CONSIDERATIONS

- ✓ Surface type and construction
- ✓ Wear, impact and drainage
- ✓ Cleaning and maintenance regime
- ✓ Specific manufacturer guidance

EXPERIENCE. PEOPLE. EQUIPMENT. PERFORMANCE.

INTRODUCING PIMCO PROSURFACE™

COMMERCIAL & SPORTS SURFACE SPECIALISTS

PIMCO PROSURFACE™ is the commercial and sports-surface division of PIMCO, established on the back of **over 7 years of successful artificial surface installation in the residential sector.**

Building on this experience, we have expanded into the commercial market, providing professional installation, maintenance, rejuvenation and asset-care solutions for **3G, 4G and 5G** sports pitches and a wide range of synthetic surfaces across the **UK and Ireland.**

EXPERIENCED DELIVERY

Over 7 years' proven track record in artificial grass installation and customer satisfaction in the residential sector, now delivering to the commercial market.

SPECIALIST MACHINERY

Significant investment in dedicated synthetic-surface installation and maintenance equipment, enabling controlled, efficient and high-quality delivery.

TRAINING & COMPETENCY

Specialist training, equipment familiarisation and controlled working procedures to ensure our teams are fully prepared for live commercial projects.

LONG-TERM ASSET CARE

A complete approach from installation to inspection, planned maintenance, rejuvenation and lifecycle support, helping clients protect their investment and maximise surface performance.

SAME COMMITMENT. BIGGER OPPORTUNITIES.

OUR APPROACH

A STRUCTURED PROCESS FOR A SAFER, HIGHER PERFORMING SURFACE

PLAN

Understand your requirements and assess your site.

INSTALL

Professional installation using the right methods, materials and equipment.

MAINTAIN

Planned maintenance programmes to keep surfaces performing at their best.

RESTORE

Deep cleaning, rejuvenation and repairs to extend surface life.

PERFORM

Maximise safety, playability, appearance and long-term value.

SKILLED TEAMS

Experienced, trained and safety-focused.

QUALITY WORKMANSHIP

Attention to detail and a professional finish.

SAFETY FIRST

Working to project specifications and recognised industry practice.

WHOLE-LIFE APPROACH

Supporting performance, planned maintenance and longer serviceable surface life.

PIMCO PROSURFACE™

COMMERCIAL & SPORTS SURFACE SOLUTIONS

INSTALL | MAINTAIN | RESTORE | PERFORM

SPECIALIST SURFACE SOLUTIONS FOR SPORT, EDUCATION AND LEISURE

OUR SERVICES

A COMPLETE, PRACTICAL APPROACH TO SYNTHETIC SURFACE PERFORMANCE

PIMCO PROSURFACE™ delivers a full range of installation, maintenance, restoration and asset-care services for synthetic sports and commercial surfaces. We combine experienced teams, specialist machinery and proven working methods to provide safe, high-performing and long-lasting surfaces for facilities across the UK and Ireland.

INSTALLATION

PROFESSIONAL SURFACE SOLUTIONS

Supply and installation of high-quality synthetic surfaces for sport, education, leisure and commercial use.

- Site survey and technical planning
- Surface preparation and base inspection
- Shockpads and system build-up
- Artificial grass installation and seaming
- Infill application and distribution
- Finishing and quality checks
- Optional line marking and accessories

MAINTENANCE & ASSET CARE

KEEPING SURFACES PERFORMING

Planned and responsive maintenance to keep synthetic surfaces safe, consistent and performing at their best.

- Planned maintenance programmes
- Mechanical brushing and grooming
- Infill management and top-up
- Decompaction and surface conditioning
- Contamination and organic matter control
- Inspections and condition reporting
- Bespoke maintenance schedules

RESTORATION & REJUVENATION

EXTEND SURFACE LIFE

Specialist cleaning, rejuvenation and repair solutions to improve condition, performance and appearance.

- Condition assessment and reporting
- Deep mechanical cleaning
- Decompaction (where appropriate)
- Infill extraction, cleaning or replacement
- Seam, joint and surface repairs
- Localised and full surface rejuvenation
- Refurbishment and replacement advice

QUALITY INSTALLATION
The right system, installed to a professional and durable standard.

PROTECT YOUR INVESTMENT
Regular care for safety, playability and long-term value.

RESTORE PERFORMANCE
Improve condition, playability and extend the service life.

SUPPORT THROUGHOUT THE SURFACE LIFECYCLE

PLAN
Assess, specify and schedule

INSTALL
Deliver and complete

MAINTAIN
Routine care and asset support

RESTORE
Clean, repair and rejuvenate

PERFORM
A safer, higher performing surface

INSTALL | MAINTAIN | RESTORE | PERFORM

PLANNED. CONTROLLED. DELIVERED. LONGER PERFORMANCE.

PROJECT DELIVERY

FROM SURVEY TO HANDOVER

At PIMCO PROSURFACE™, we follow a structured 10-step delivery process to ensure every project is planned, managed and delivered to the highest standards. From the initial site survey to final handover and aftercare, our experienced team works closely with you at every stage to ensure a safe, efficient and professional outcome.

1 SURVEY & SCOPE
UNDERSTAND REQUIREMENTS

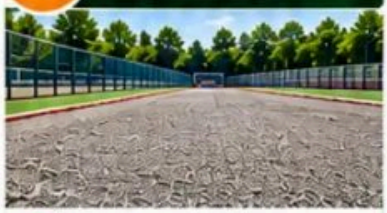

- Discuss client objectives and site requirements
- Site survey and measurements
- Review drawings and specifications
- Assess site conditions and access
- Agree programme, logistics and scope of works

2 PLANNING & METHODOLOGY
DETAILED PROJECT PREPARATION

- Develop method statement and programme
- Prepare roll plan and waste plan
- Confirm resources, plant and labour
- H&S plan and risk assessment
- Agree communication plan

3 SITE READINESS & INTERFACE
REVIEW AND CONFIRM

- Review prepared sub-base (where provided by others)
- Check levels, falls and drainage
- Confirm area ready to receive surface
- Record pre-installation observations
- Site induction and access arrangements

4 MATERIALS & LOGISTICS
DELIVERY, STORAGE & HANDLING

- Coordinate deliveries and site storage
- Inspect materials on arrival
- Handle and move rolls using correct equipment
- Protect materials from damage/contamination
- Manage logistics and site access safely

5 SETTING OUT
ACCURATE ALIGNMENT

- Establish reference points and levels
- Set out to drawings and specifications
- Lay rolls in sequence (as per roll plan)
- Allow for pile direction and joins
- Trim and fit for precise alignment

6 INSTALLATION
FITTING & SEAMS

- Position, cut and fit the carpet
- Prepare and align seam interfaces
- Apply specified tapes and adhesives
- Integrate supplied line-marking system
- Check alignment and finish seams cleanly

7 INFILL INSTALLATION & CONDITIONING
CONTROLLED APPLICATION

- Calibrated application of specified infill (where required by the surface system)
- Controlled application rates
- Multiple passes for even distribution
- Mechanical brushing and grooming
- Final distribution and surface conditioning

8 INSPECTION & FINISHING
QUALITY AND PRESENTATION

- Visual and dimensional inspection
- Check seams, line markings and infill levels
- Assess surface appearance and playability
- Identify and address any defects
- Ensure compliance with project specification

9 HANDOVER
CLIENT WALKTHROUGH & DOCUMENTATION

- Final inspection with client
- Provide care and maintenance guidance
- Issue relevant documentation and warranties (as supplied by manufacturer)
- Confirm project completion and sign-off

10 AFTERCARE & SUPPORT
ONGOING PERFORMANCE

- Maintenance advice and guidance
- Support planned maintenance programmes
- Ongoing technical support
- Advice on repairs, rejuvenation or replacement
- Help maximise surface life and performance

CONTROLLED DELIVERY FOR LASTING PERFORMANCE

DEFINED SCOPE
Clear responsibilities and interfaces.

DOCUMENTED PROCESS
Recorded installation and inspection stages.

QUALITY CHECKS
Identify issues before handover.

CLIENT FOCUS
Clear communication, reliable delivery and ongoing support.

WORKING TO YOUR PROJECT REQUIREMENTS

- Project specification and drawings.
- Manufacturer installation requirements.
- Relevant industry standards (where specified).
- Independent testing (where required).
- Safe, durable and high-quality playing surfaces.

FROM SURVEY TO HANDOVER. A PROFESSIONAL APPROACH.

SAFE | EFFICIENT | QUALITY | LONG LASTING

PLAN IT RIGHT | INSTALL IT RIGHT | CHECK IT RIGHT | SUPPORT IT PROPERLY

PIMCO PROSURFACE™

COMMERCIAL & SPORTS SURFACE SOLUTIONS

INSTALL | MAINTAIN | RESTORE | PERFORM

HIGH PERFORMANCE SURFACES FOR FOOTBALL, RUGBY AND MULTI-SPORT FACILITIES.

FOOTBALL & RUGBY

3G, 4G & 5G SYNTHETIC SURFACE SYSTEMS

PIMCO PROSURFACE™ provides installation, infill, finishing and lifecycle maintenance solutions for synthetic football, rugby and multi-sport pitches. Surface specification is determined by intended use, governing-body requirements, system design, performance criteria and the client's operational needs.

3G — INFILLED SPORTS TURF SYSTEMS

Proven performance for clubs, schools and community facilities.

TYPICAL SYSTEM ELEMENTS

- Synthetic turf carpet
- Stabilising sand and performance infill (SBR, EPDM, TPE or organic)
- Shockpad (where specified)
- Engineered base and drainage
- Line markings (inlaid or surface applied)

TYPICAL APPLICATIONS

5-a-side, 7-a-side and 11-a-side pitches, club facilities, training grounds, academies, schools and community sports facilities.

4G — NON-INFILL / REDUCED-INFILL SYSTEMS

Industry term for non-infill or reduced-infill turf systems.

TYPICAL SYSTEM ELEMENTS

- Synthetic turf carpet (non-infill or reduced infill)
- Shockpad (system dependent)
- Engineered base and drainage
- Line markings (as specified)
- Alternative infill options (where required)

"4G" is an industry term commonly used for newer-generation systems designed to reduce or eliminate performance infill. Final suitability depends on the specific manufactured system and required performance standard.

5G — ADVANCED SYNTHETIC TURF SYSTEMS

Manufacturer term for advanced hybrid or non-infill systems.

TYPICAL SYSTEM ELEMENTS

- Advanced synthetic fibre system
- Reduced or no infill (system specific)
- Shockpad (where specified)
- Engineered base and drainage
- Specialist line-marking solutions

"5G" is used commercially for advanced synthetic-turf concepts and varies between manufacturers. PIMCO PROSURFACE™ assesses the actual system specification, intended sport and required performance criteria rather than relying on generation terminology alone.

FOOTBALL APPLICATIONS

- 5-a-side, 7-a-side, 9-a-side and 11-a-side pitches
- Club facilities and academies
- Schools, colleges and universities
- Community and local authority facilities
- Training and performance centres
- Commercial small-sided football centres

SAFE. DURABLE. HIGH-PERFORMANCE PLAYING SURFACES.

RUGBY APPLICATIONS

- Rugby union and rugby league
- Club and grassroots facilities
- Training grounds and academies
- World Rugby-compliant shockpad and turf systems
- Schools, colleges and universities
- Community and regional facilities

BUILT FOR CONTACT. DESIGNED FOR PERFORMANCE.

FIFA QUALITY PROGRAMME

FIFA QUALITY

The FIFA Quality and FIFA Quality Pro are certification programmes for complete installed football-turf fields that meet the applicable FIFA testing requirements. Product selection alone does not make a completed pitch FIFA-certified.

PIMCO PROSURFACE™ installs specified football-turf systems and coordinates with independent, FIFA-accredited test institutes where certification forms part of the project scope.

WORLD RUGBY

WORLD RUGBY™

For rugby applications, surface selection and performance must account for the intended level and type of play and the applicable governing-body requirements, including World Rugby Regulation 22 and Rugby Turf Performance Specification where relevant.

PIMCO PROSURFACE™ installs compliant turf and shockpad systems and supports independent field testing where certification is required.

Logos shown for reference to applicable governing-body standards only; independent testing and certification are conducted by accredited test institutes.

KEY BENEFITS

- PLAYER SAFETY
- RELIABLE PERFORMANCE
- SUITABLE USAGE (AS SPECIFIED)
- LONG-TERM VALUE
- SUITABLE FOR ALL LEVELS OF PLAY

DISCUSS YOUR PITCH REQUIREMENTS

PIMCO PROSURFACE™

COMMERCIAL & SPORTS SURFACE SOLUTIONS

INSTALL | MAINTAIN | RESTORE | PERFORM

- PADEL
- TENNIS
- MULTI-SPORT (MUGA)
- SCHOOLS
- COMMUNITY & LEISURE

PADEL, TENNIS & MULTI-SPORT

SPECIALIST COURT & MUGA SURFACE SYSTEMS

PIMCO PROSURFACE™ provides synthetic-surface installation, finishing and lifecycle maintenance solutions for padel, tennis and multi-use sports facilities. Surface selection should reflect the intended sports, level and frequency of use, drainage requirements, performance characteristics and applicable project specification.

01 PADEL SURFACES

FAST-GROWING. HIGH-PERPORMANCE.

- Synthetic turf system to suit court specification
- Controlled sand distribution
- Consistent ball response and player traction
- Drainage and surface preparation
- Correct fibre orientation and grooming
- Planned maintenance for long-term performance

TYPICAL APPLICATIONS

- Padel clubs and centres
- Leisure and hospitality facilities
- Schools and universities
- Community and recreational facilities
- Surface works can be coordinated within wider padel-court construction packages where required.

02 TENNIS SURFACES

CONSISTENT PLAY. DURABLE SOLUTIONS.

- Synthetic turf court systems
- Recreational and club applications
- Controlled sand infill where specified
- Consistent surface presentation
- Integrated line systems
- Drainage considerations
- Maintenance and rejuvenation

TYPICAL APPLICATIONS

- Tennis clubs and training centres
- Schools, colleges and universities
- Community sports facilities
- Leisure and holiday parks
- Private and residential courts

03 MULTI-USE GAMES AREAS (MUGA)

VERSATILE SPACES FOR ACTIVE COMMUNITIES.

- Durable synthetic surfaces for multi-sport use
- Suitable for football, tennis, netball, basketball and other activities (system dependent)
- Designed for schools, councils and community facilities
- Hard-wearing surface solutions with manageable maintenance
- Custom line markings and colour combinations
- Drainage and sub-base designed to project requirements

TYPICAL APPLICATIONS

- Schools and education facilities
- Community and local authority projects
- Leisure centres and sports hubs
- Parks and recreation areas
- Multi-sport training and activity zones

04 SELECT THE SYSTEM – NOT JUST THE COLOUR

A SURFACE SYSTEM SHOULD BE CHOSEN TO MATCH YOUR SPECIFIC REQUIREMENTS.

SPORT
What activities will take place?

USAGE
School, club, community, commercial or competition?

PERFORMANCE
Traction, ball behaviour, shock absorption and player interaction.

DRAINAGE
Existing construction and water management.

MAINTENANCE
Maintenance regime to maintain appearance and performance.

LIFECYCLE
Expected intensity of use and long-term requirements.

PROJECT-SPECIFIC REQUIREMENTS

Surface systems should be selected against the applicable project specification, intended sports and relevant governing-body or facility guidance where required.

QUALITY SURFACES

PIMCO PROSURFACE™

COMMERCIAL & SPORTS SURFACE SOLUTIONS

INSTALL | MAINTAIN | RESTORE | PERFORM

ACTIVE SPACES. HEALTHIER PEOPLE. STRONGER COMMUNITIES.

SCHOOLS, PLAY & PUBLIC SPACES

DURABLE SURFACE SOLUTIONS FOR ACTIVE ENVIRONMENTS

PIMCO PROSURFACE™ provides synthetic-surface solutions for schools, children's play areas, community facilities, councils and public spaces. Our surfaces are designed to meet the specific requirements of the users, the intended activities and the environment, with a focus on durability, performance, practicality and long-term value.

01 SCHOOLS & EDUCATION

SPORT, RECREATION AND ACTIVITY AREAS

- Primary and secondary schools
- Colleges and universities
- Multi-use games areas (MUGAs)
- Sports training and PE facilities
- Activity and recreation spaces
- Durable surfaces for intensive daily use
- Defined line markings and activity zones
- Drainage appropriate to the application
- Planned maintenance considerations
- Surface specification based on intended use

SUPPORTING ACTIVE, HEALTHY SCHOOL ENVIRONMENTS.

02 CHILDREN'S PLAY & SAFER SURFACING

SAFE, DURABLE AND ENGAGING PLAY SPACES

- Synthetic grass play areas
- Shock-attenuating systems where specified
- EPDM rubber safety surfacing (wet-pour)
- Playground zones and activity trails
- Nurseries, early-years and school play areas
- Designed for heavy use and all-weather conditions
- Wide range of colours and design options
- Surface systems to suit equipment and fall heights
- Durable, hard-wearing solutions
- Suitable for imaginative and inclusive play spaces

PLAY SPACES THAT INSPIRE AND LAST.

03 COUNCILS & PUBLIC SPACES

COMMUNITY, RECREATION AND AMENITY AREAS

- Public recreation areas and parks
- Community sports and leisure facilities
- Multi-use games areas and outdoor gyms
- High-footfall amenity spaces
- Landscaped open spaces and walkways
- Robust surfaces for repeated and varied use
- Accessible design considerations
- Practical maintenance requirements
- Surface selection appropriate to location and use
- Options for sports, play and general amenity areas

WELL-USED SPACES FOR STRONGER COMMUNITIES.

04 SPECIFY FOR THE USERS & ENVIRONMENT

EVERY PROJECT IS DIFFERENT. THE RIGHT SURFACE STARTS WITH THE RIGHT SPECIFICATION.

AGE & ACTIVITY
Who will use the area? Children, young people, adults or mixed use?

INTENDED USE
Sport, play, recreation or multi-use?

IMPACT REQUIREMENTS
Is shock attenuation required?

ACCESSIBILITY
How will people enter and move through the facility?

DRAINAGE
Existing construction and water management.

MAINTENANCE
What inspection and maintenance regime is realistic for the intended use and location?

SAFETY STARTS WITH SPECIFICATION

Surface performance depends on the complete installed system, its intended use, condition and ongoing maintenance. Where specific impact or sports-performance requirements apply, the Critical Fall Height (CFH) and applicable playground impact standards (e.g. BS EN 1177) should be considered during design and specification.

SCHOOLS & MUGAS

BUILT FOR A BETTER TOMORROW

PIMCO PROSURFACE™

COMMERCIAL & SPORTS SURFACE SOLUTIONS

INSTALL | MAINTAIN | RESTORE | PERFORM

- HOTELS & HOSPITALITY
- GYMS & FITNESS
- COMMERCIAL & WORKPLACES
- AMENITY & LANDSCAPE

COMMERCIAL, LEISURE & HOSPITALITY

SYNTHETIC SURFACES BEYOND TRADITIONAL SPORT

PIMCO PROSURFACE™ supports commercial, leisure and hospitality environments with synthetic-surface solutions selected around use, appearance, durabiiity and ongoing maintenance. From specialist fitness surfaces and leisure facilities to hospitality, workplace and amenity applications, each system is considered against the practical requirements of the project.

01 HOTELS, HOSPITALITY & LEISURE

PREMIUM ENVIRONMENTS. LASTING IMPRESSIONS.

- Hotels, resorts and holiday parks
- Poolside and leisure areas (where suitable)
- Rooftop terraces and amenity spaces
- Attractive, tidy, easy-to-care-for surfaces
- Durable solutions for high-use guest areas
- A range of finishes to suit the environment

02 GYMS & FITNESS

FUNCTIONAL SPACES. BUILT FOR PERFORMANCE.

- Indoor and outdoor functional training areas
- Sled tracks, sprint lanes and strength zones
- Specialist synthetic turf systems for fitness applications
- Defined line markings and training zones
- Durable surfaces for repeated and intensive use
- Shock-absorbing backing where required and indoor fire-rating compliance (where specified)

03 COMMERCIAL & WORKPLACE

CREATIVE, PRACTICAL SPACES FOR MODERN BUSINESS.

- Office and corporate campuses
- Breakout and recreation areas
- Exhibition and event environments
- Retail units and commercial developments
- Showrooms and display areas
- Rooftop, terrace and podium installations

04 AMENITY, LANDSCAPE & LEISURE

ATTRACTIVE SURFACES FOR EVERYDAY SPACES.

- Public and private amenity areas
- Landscaped spaces and communal areas
- Rooftop and podium environments
- Leisure and recreational facilities
- High-footfall areas with practical maintenance requirements
- A range of surface finishes to suit design and application

COMMERCIAL SURFACES HAVE DIFFERENT PRIORITIES

Every project is unique. The right surface is selected to match the intended use, environment and client requirements.

USE	FOOTFALL	APPEARANCE	DRAINAGE	ACCESS	MAINTENANCE
What activity will take place?	What level of traffic is expected?	What finish suits the environment?	How will water be managed?	What installation or logistical constraints exist?	What ongoing care is realistic?

IMPORTANT CONSIDERATIONS

Surface installation must be coordinated with the underlying construction, drainage, waterproofing and access requirements applicable to the project.

PIMCO PROSURFACE™

COMMERCIAL & SPORTS SURFACE SOLUTIONS

INSTALL | MAINTAIN | RESTORE | PERFORM

CLEANER SAFER GREENER FOR LONGER.

DEEP CLEANING & REJUVENATION

RESTORE PERFORMANCE. EXTEND SERVICEABLE LIFE.

PIMCO PROSURFACE™ provides specialist deep-cleaning and rejuvenation services for synthetic sports surfaces. Using our own professional machinery and proven techniques, we remove contamination, relieve infill compaction (where appropriate to the surface system), recondition the surface and improve presentation, helping to extend the serviceable life of your investment.

01 DECOMPACTION & CONTAMINATION REMOVAL

REDEXIM VERTI-TOP 1500 / 1800

- Deep decompaction of infill (for infill systems, subject to surface construction)
- Removal of organic debris and contamination
- Improves drainage and surface condition
- Restores fibre structure and performance

02 INFILL CONDITIONING & REDISTRIBUTION

REDEXIM RINK 1210

- Calibrated infill spreading and top-up
- Accurate and consistent application
- Restores correct infill levels
- Suitable for sand and rubber infill systems
- Improves surface stability and playability

03 FIBRE REORIENTATION & SURFACE GROOMING

SISIS OSCA 3

- Mechanical brushing to lift and dress fibres
- Rejuvenates flattened and high-use areas
- Improves surface appearance
- Enhances consistency and performance
- Ideal as a final conditioning process

REAL DIFFERENCE. VISIBLE RESULTS.

Deep cleaning removes contamination, relieves infill compaction and restores the surface, improving appearance, playability and safety.

Results vary depending on surface age, fibre condition, and maintenance history.

SURFACE CONDITION MATTERS

Contamination, compaction, displaced infill, damaged seams and excessive wear can affect surface condition and performance. Specialist deep cleaning and appropriate maintenance help identify issues before determining the correct intervention.

MAINTAIN OR REJUVENATE?

ROUTINE MAINTENANCE
Manages a serviceable surface through regular care and grooming.

DEEP CLEANING & REJUVENATION
Addresses contamination, compaction, infill condition and presentation deterioration.

REPLACEMENT
May be required where the surface or underlying system has reached the end of its serviceable condition.

KEY BENEFITS

- Improved surface appearance
- Safer playing surfaces
- Enhanced playability
- Extended serviceable life
- Effective and economical asset management

OUR SPECIALIST MACHINERY FLEET

THE RIGHT EQUIPMENT. THE RIGHT PROCESS. A BETTER SURFACE.

PIMCO PROSURFACE™ operates its own specialist machinery and tools to deliver professional installation, infill and maintenance services for 3G/4G/5G synthetic sports surfaces.

KUBOTA L1-382 HST

- 38 hp compact tractor (HST)
- Turf tyres – minimal ground pressure
- PTO and 3-point linkage
- Ideal for synthetic surface equipment
- Power, reliability and versatility

THE POWER BEHIND A BETTER FINISH.

REDEXIM VERTI-TOP 1800

- Deep cleaning & decompaction
- Removes contamination and debris
- Restores infill depth and performance
- Ideal for infill turf systems (as specified)
- Professional, consistent results

DEEP CLEAN. RESTORE PERFORMANCE.

REDEXIM RINK 1210

- Calibrated infill spreading
- Accurate application (kg/m²)
- Suitable for sand and rubber infill
- Consistent infill levels across pitch
- Improves performance and longevity

ACCURATE INFILL. OPTIMAL PLAY.

SISIS OSCA 3

- High-performance oscillating brush
- Lifts and reorients fibres effectively
- Improves infill distribution
- Enhances appearance and playability
- Essential for installation and ongoing maintenance

FIBRE REORIENTATION. A PROFESSIONAL FINISH.

SISIS VARIBRUSH

- Static / trailing brush
- Further brushing and grooming
- Ideal for final finishing
- Helps maintain even infill levels
- Complements the Osca 3

THE FINISHING TOUCH.

3G/4G/5G POWER BRUSH

- Self-propelled pedestrian groomer
- Ideal for edges, smaller areas and details
- Multiple brush configurations
- Suitable for 3G/4G/5G surfaces
- Improves fibre presentation and infill levels

PERFECT EDGES. PROFESSIONAL RESULTS.

KAWASAKI MULE (UTILITY)

- Transport equipment and materials
- Move infill, tools and accessories
- Ideal for site support and logistics
- Essential for larger projects
- Robust and reliable

ON-SITE SUPPORT AND PRODUCTIVITY.

SURFACE SYSTEMS

TURF, SHOCKPADS, INFILL AND PERFORMANCE LAYERS

PIMCO PROSURFACE™ delivers complete synthetic surface systems designed for sport, leisure, education, commercial and public sector environments. A high-performance artificial pitch is more than just the turf. It is a fully integrated system of layers, each working together to provide performance, safety, durability and long-term value.

THE COMPLETE SURFACE SOLUTION

- ✓ Performance
- ✓ Player Safety
- ✓ Durability
- ✓ Consistent Play
- ✓ Manageable Maintenance
- ✓ Long-Term Value

Illustrative infilled-turf construction — actual layer arrangement varies by specified system.

SYNTHETIC TURF SYSTEMS

High-quality 3G, 4G and 5G artificial grass systems designed for specific sports and performance standards. Engineered for durability, playability and consistent performance.

INFILL SYSTEMS

Calibrated silica sand and performance infill (where required by the system specification) stabilise the turf, maintain fibre support and deliver the required playing characteristics for each application.

BACKING AND CARPET CONSTRUCTION

High-strength, durable backing systems with excellent tuft bind and dimensional stability. Engineered for long-term performance in commercial and sports environments.

SHOCKPADS & PERFORMANCE LAYERS

Where required, shockpads improve player comfort, impact absorption and performance consistency. A range of shockpad solutions are **available** to meet specific sport and performance requirements.

SUB-BASE AND DRAINAGE INTERFACE

The surface system is installed onto a properly engineered, permeable sub-base (whether constructed as part of the package or prepared by others) with effective drainage to ensure rapid water dispersion and long-term structural stability.

GEOTEXTILE AND GROUND PREPARATION

A separation layer can be included (where specified by the design) to help prevent contamination from sub-grade and to support drainage performance and system integrity over time.

TAILORED SYSTEMS FOR DIFFERENT APPLICATIONS

THE RIGHT SYSTEM FOR EVERY ENVIRONMENT

FOOTBALL & RUGBY
3G, 4G & 5G systems for 5, 7 and 11-a-side

PADEL, TENNIS & MULTI-SPORT
Specialist surfaces for rackets and multi-use games areas

SCHOOLS & PLAY AREAS
Safe, durable and high-performance systems

GYMS & FITNESS
Hard-wearing surfaces for indoor and outdoor training

HOTELS, LEISURE & COMMERCIAL
Attractive, durable surfaces for high-traffic environments

ENGINEERED FOR PERFORMANCE

Each system is specified to meet the demands of the intended use, manufacturer requirements and the required performance standard.

SAFE & DURABLE

Designed to deliver consistent play, excellent drainage and long-term reliability across a wide range of weather conditions.

SYSTEM INTEGRATION

All layers work together to provide optimal performance, from sub-base to finished playing surface.

SUSTAINABLE SOLUTIONS

Modern synthetic surface systems offer long service life, structured maintenance and responsible material choices.

INSPECTION & REPORTING

DATA-LED ASSET CARE

PIMCO PROSURFACE™ provides professional inspection and reporting services to assess the visual and physical condition, performance and safety of your synthetic sports surface. Regular, detailed inspections help identify wear, contamination and potential issues at an early stage, allowing planned maintenance to keep your surface performing at its best and to extend its lifespan.

THE BENEFITS

- ✓ Identify issues early
- ✓ Improve playing performance
- ✓ Enhance player safety
- ✓ Plan maintenance budgets
- ✓ Extend surface lifespan
- ✓ Protect your investment

INFILL DEPTH & DISTRIBUTION

- ✓ Check infill levels
- ✓ Assess distribution
- ✓ Identify low/high areas
- ✓ Maintain performance and fibre support

SURFACE, SEAMS & LINES

- ✓ Inspect surface condition
- ✓ Check seams and joints
- ✓ Assess line markings
- ✓ Identify wear or damage
- ✓ Recommend remedial actions

FIBRE CONDITION

- ✓ Assess fibre wear
- ✓ Examine pile height
- ✓ Check for matting
- ✓ Identify UV or weather effects
- ✓ Evaluate overall surface appearance

CONTAMINATION

- ✓ Identify moss, algae, weeds
- ✓ Check for leaves and debris
- ✓ Assess organic build-up
- ✓ Recommend cleaning treatments
- ✓ Improve hygiene and appearance

DRAINAGE & EDGES

- ✓ Assess water movement
- ✓ Check drainage performance
- ✓ Inspect perimeter and retaining details
- ✓ Identify trip hazards or damage
- ✓ Recommend corrective work

HIGH-WEAR AREAS

- ✓ Identify high-use zones
- ✓ Assess surface condition
- ✓ Evaluate infill loss
- ✓ Recommend targeted maintenance
- ✓ Maintain consistent playing performance

OUR INSPECTION PROCESS

1. **INSPECT** — Detailed visual assessment
2. **RECORD** — Photos, data and observations
3. **ASSESS** — Condition, risks and performance
4. **REPORT** — Clear findings and recommendations
5. **RECOMMEND** — Planned maintenance and remedial actions

PROFESSIONAL REPORTS

Following inspection, we provide a clear, easy-to-understand report with:

- ✓ Executive summary
- ✓ Detailed findings with photographs
- ✓ Annotated pitch plan
- ✓ Condition ratings and priorities
- ✓ Recommended maintenance actions
- ✓ Estimated timescales and budget guidance

Visual condition and maintenance assessment; independent laboratory/governing-body performance testing arranged separately where required.

PIMCO PROSURFACE™

INSPECTION REPORT

Site:	Example 3G Facility
Date:	20 January 2025
Surface Type:	3G Football Pitch
Inspection Type:	Routine Condition Inspection

- Good Condition
- Monitor
- Maintenance Required
- Urgent Attention

KEY FINDINGS

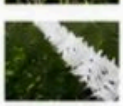

Infill level low in high-use areas. Recommend top-up.

Line marking showing wear. Recommend re-instatement.

Surface debris present. Recommend deep clean.

Seam in good condition. No action required.

RECOMMENDATIONS

Priority	Action	Timescale
1	Top up infill (goal areas)	1–3 months
2	Re-instate line markings	1–3 months
3	Deep clean surface	3–6 months
4	Monitor infill levels	6–12 months
5	General maintenance	Ongoing

CONCLUSION

The surface is in good overall condition with some localised wear in high-use areas. With planned maintenance, the pitch will continue to provide a safe, high-performing playing surface for many years.

MAINTENANCE PROGRAMMES

STRUCTURED LONG-TERM CARE

PIMCO PROSURFACE™ offers structured maintenance programmes to keep your synthetic sports surfaces clean, safe and performing at their best. Regular, professional maintenance not only improves appearance and playability, but also extends the life of your surface and protects your investment.

A TAILORED APPROACH

- Surface type and specification
- Level of use and user profile
- Environment and location
- Current condition of the surface
- Client objectives and budget

BRONZE — ESSENTIAL CARE — 1 VISIT PER YEAR

- Visual inspection
- Mechanical brushing and grooming
- Debris and leaf removal
- Basic contamination treatment
- Condition report with recommendations

CLEANER SURFACES, ESSENTIAL CARE.

SILVER — ENHANCED PERFORMANCE — 2 VISITS PER YEAR

- All Bronze services
- Infill assessment and top-up (where required)
- Targeted deep clean (as required)
- Drainage and perimeter checks
- Written condition report with recommendations

BETTER PLAY, GREATER DURABILITY.

GOLD — COMPLETE PROTECTION — 3 VISITS PER YEAR

- All Silver services
- Full mechanical brushing and grooming
- Infill management and top-up (where required)
- Deep cleaning and contamination treatment
- Detailed inspection and performance report
- Priority call-out support

OPTIMUM PERFORMANCE. YEAR ROUND.

COMMERCIAL & BESPOKE — TAILORED TO YOUR FACILITY

- Customised maintenance schedules
- Multi-pitch and multi-site programmes
- Schools, councils, clubs and leisure
- Event and seasonal maintenance
- Reactive call-outs
- Detailed reporting and budget planning
- Solutions tailored to usage, environment and facility requirements

FLEXIBLE SOLUTIONS, LASTING VALUE.

Infill materials supplied as specified or priced according to required volume.

OUR MAINTENANCE PROCESS

1. **INSPECT** — Assess condition and identify needs
2. **CLEAN & GROOM** — Remove debris, rejuvenate surface
3. **INFILL MANAGEMENT** — Check levels and top-up where required
4. **REPORT** — Provide findings and recommendations
5. **PLAN AHEAD** — Keep your surface performing for longer

BEFORE & AFTER THE DIFFERENCE IS CLEAR

TYPICAL ANNUAL MAINTENANCE TIMELINE

SPRING	SUMMER	AUTUMN	WINTER
✓ Inspection	✓ Brushing	✓ Inspection	✓ Assessment
✓ Brushing	✓ Infill top-up	✓ Brushing	✓ Reactive works
✓ Debris removal	✓ Targeted clean	✓ Leaf removal	✓ Prepare for next season
✓ Infill check	✓ Condition check	✓ Drainage check	

Frequency and activities may vary depending on surface type, usage, environment and condition.

KEY BENEFITS

- LONGER SURFACE LIFE
- SAFER PLAYING CONDITIONS
- CONSISTENT PERFORMANCE
- LOWER LIFECYCLE COSTS
- CLEANER, HEALTHIER ENVIRONMENTS
- POSITIVE EXPERIENCE FOR PLAYERS & USERS

PIMCO PROSURFACE™

INSTALLATION QUALITY

SEAMS, LINES, INFILL & FINISHING

PIMCO PROSURFACE™ combines proven installation methods with specialist machinery and experienced teams to deliver professional, durable and high-performing synthetic sports surfaces. Every installation is carried out with precision and care, ensuring a consistent finish, accurate lines and optimal infill levels (where required by system specification) for long-term performance.

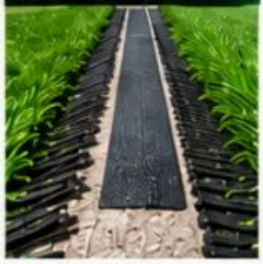

1 SUB-BASE & PREPARATION

- Groundworks by others or PIMCO where required
- Suitable sub-base, drainage and levels
- Checked for falls, flatness and tolerances
- Area prepared for carpet installation

A SOLID FOUNDATION FOR PERFORMANCE.

2 TURF INSTALLATION & SEAMS

- Professional installation by experienced teams
- High-strength seam tape and adhesive systems
- Tight, clean and durable seams
- Seam locations planned to minimise visibility

STRONG SEAMS. A SMOOTH, CONSISTENT SURFACE

3 LINE MARKINGS

- Accurate setting out to design drawings
- Inlaid or adhesive lines to specification
- Sharp, consistent finishes
- Multiple sport line markings available

CLEAR, ACCURATE AND DURABLE LINES.

4 INFILL APPLICATION

- Calibrated infill spreading (Redexim Rink 1210)
- Even distribution of sand and performance infill (where required by system specification)
- Correct infill levels to manufacturer requirements
- Brushing and levelling throughout the process

ACCURATE INFILL LEVELS FOR OPTIMAL PLAY.

5 FIBRE REORIENTATION & GROOMING

- Mechanical brushing (SISIS Osca 3)
- Fibre reorientation for consistent appearance
- Improves infill distribution
- Enhances playing performance and surface longevity

A CONSISTENT, NATURAL PLAYING SURFACE.

6 FINAL FINISH & QUALITY CHECK

- Final groom and levelling
- Line markings inspected
- Infill levels checked (where required by system specification)
- Surface inspection and snagging
- Handover with recommendations

PROFESSIONAL FINISH. READY FOR PLAY.

SPECIALIST EQUIPMENT OWNED & OPERATED BY PIMCO PROSURFACE™

- PROFESSIONAL HANDOVER
- BUILT FOR LONG-TERM PERFORMANCE

QUALITY ASSURANCE

INSPECTION, TESTING & HANDOVER

PIMCO PROSURFACE™ follows a detailed quality assurance process to ensure every project is completed to specification, meets the required standards and is handed over in first-class condition. From initial inspection to final sign-off, our focus is on accuracy, consistency and long-term performance.

1 WORKS INSPECTION

- Visual inspection of completed works
- Check seams, lines and edges
- Assess surface presentation
- Identify any areas for attention

A DETAILED INSPECTION AT EVERY STAGE.

2 SYSTEM CHECKS

- Check infill depth and distribution (where applicable)
- Confirm fibre orientation
- Assess surface consistency
- Verify installation details and workmanship

THE RIGHT SPECIFICATION. THE RIGHT PERFORMANCE.

3 PERFORMANCE & SPECIFICATION REVIEW

- Check against project specification
- Ensure compliance with manufacturer guidelines
- Review surface performance requirements
- Independent specialist testing arranged where required

BUILT TO SPECIFICATION. FIT FOR PURPOSE.

4 DEFECT CLOSE-OUT

- Record any snags or defects
- Carry out corrective works
- Recheck and confirm resolution
- Ensure all workmanship meets our standards

ANY ISSUES IDENTIFIED, CORRECTED AND RECHECKED.

5 DOCUMENTED HANDOVER

- Full completion records
- Photographic documentation
- Maintenance recommendations
- Client handover and guidance
- Ongoing support options

FULL DOCUMENTATION. PEACE OF MIND.

INDEPENDENT TESTING WHERE REQUIRED

Where formal performance testing is required (e.g. FIFA, World Rugby or other accredited standards), this is arranged through independent specialist testing organisations in line with the project specification and client requirements.

OUR QUALITY COMMITMENT

- High-quality workmanship
- Consistency across all projects
- Compliance with manufacturer requirements
- Careful inspection and testing procedures
- Clear documentation and client handover
- Ongoing support and maintenance advice

ATTENTION TO DETAIL. A SURFACE YOU CAN TRUST.

Our quality assurance process ensures your synthetic surface is installed, checked and handed over to the highest standard – delivering a safe, consistent and long-lasting playing surface.

PERFECT LINES & SEAMS

PIMCO PROSURFACE™

COMMERCIAL & SPORTS SURFACE SOLUTIONS

INSTALL | MAINTAIN | RESTORE | PERFORM

- EXTEND SURFACE LIFE
- REDUCE PREMATURE REPLACEMENT
- RESPONSIBLE RESOURCE MANAGEMENT
- SUSTAINABLE ASSET CARE
- SUPPORTING COMMUNITIES

SUSTAINABILITY & WHOLE-LIFE VALUE

EXTENDING SURFACE LIFE. REDUCING PREMATURE REPLACEMENT.

Responsible asset care from installation through to end-of-life.

At PIMCO PROSURFACE™ we take a long-term approach, helping clients get the maximum performance and value from their synthetic sports surfaces. Through correct specification, professional installation, planned maintenance, rejuvenation and targeted repair, we help extend the serviceable life of your surface and reduce the need for premature replacement.

1 EXTEND SERVICEABLE LIFE

- ✓ Correct specification for intended use
- ✓ Professional installation to manufacturer standards
- ✓ Planned maintenance to preserve performance
- ✓ Rejuvenation before replacement is necessary

LONGER LASTING SURFACES. GREATER WHOLE-LIFE VALUE.

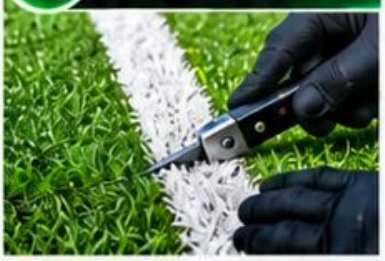

2 MAINTAIN & RESTORE

- ✓ Regular brushing and grooming
- ✓ Decompaction and contamination removal (where appropriate)
- ✓ Infill management and top-up as required
- ✓ Targeted cleaning and surface rejuvenation
- ✓ Maintain playing performance and safety

WELL MAINTAINED SURFACES. BETTER PERFORMANCE FOR LONGER.

3 REPAIR BEFORE REPLACE

- ✓ Assess and repair seams
- ✓ Repair line markings
- ✓ Address localised wear areas
- ✓ Replace damaged sections where required
- ✓ Targeted intervention to avoid unnecessary full surface replacement

TARGETED REPAIRS. REDUCED DISRUPTION AND COST.

4 RESPONSIBLE END-OF-LIFE

- ✓ When removal is required, materials and options are assessed
- ✓ Disposal and recycling routes considered according to material type and project requirements
- ✓ Work with specialist facilities where available
- ✓ Aim to minimise environmental impact at end-of-life

RESPONSIBLE DISPOSAL. A MORE SUSTAINABLE APPROACH.

THE SURFACE LIFECYCLE

A joined-up approach from specification to end-of-life, focused on performance, longevity and responsible resource use.

SPECIFY	INSTALL	MAINTAIN	RESTORE	REPAIR	REPLACE RESPONSIBLY
Right surface for the application	To manufacturer standards	Planned care and monitoring	Rejuvenation and infill care (where applicable)	Before replacement where possible	Consider disposal and recycling options

PIMCO PROSURFACE™

COMMERCIAL & SPORTS SURFACE SOLUTIONS

- QUALITY FOCUSED
- A RELIABLE PARTNER

WHY CHOOSE PIMCO PROSURFACE™

OUR COMPETITIVE ADVANTAGE

PIMCO PROSURPACE™ combines specialist knowledge, professional installation and maintenance capability, and a significant investment in our own machinery to deliver high-quality, durable synthetic sports surfaces. We take a practical, solutions-focused approach and work in partnership with clients to deliver facilities that perform for the long term.

1 SPECIALIST KNOWLEDGE & EXPERIENCE

- Proven experience in synthetic sports surfaces
- Trained and competent installation teams
- Practical, real-world knowledge
- Solutions for a wide range of facilities and users

EXPERIENCE THAT DELIVERS RESULTS.

2 PIMCO-OWNED SPECIALIST MACHINERY

- Kubota tractor and specialist PTO equipment
- Oscillating, static and pedestrian brushing
- Calibrated infill spreading equipment
- Dedicated maintenance machinery

GREATER CONTROL. HIGHER STANDARDS.

3 COMPLETE SERVICE OFFERING

- Installation, infill (as specified) and line marking
- Planned maintenance and rejuvenation
- Deep-cleaning, decompaction and contamination removal (where applicable)
- Targeted repairs and refurbishment

ONE PARTNER. EVERY STAGE OF THE SURFACE LIFE CYCLE.

4 QUALITY, COMPLIANCE & SAFETY

- Installation to specification and manufacturer guidelines
- Consistent processes and quality control
- Independent testing where required
- Health, safety and environmental awareness

QUALITY WORKMANSHIP. PEACE OF MIND.

5 PLANNED ASSET CARE

- Structured maintenance programmes
- Infill management and surface rejuvenation
- Extend the serviceable life of your surface
- Reduce long-term costs and minimise disruption

LOOK AFTER YOUR INVESTMENT.

6 UK & IRELAND COVERAGE

- Established operations in the UK and Ireland
- Nationwide mobilisation across England, Scotland, Wales and Ireland
- Experienced in dealing with different facility types
- Flexible, professional and reliable service

LOCAL KNOWLEDGE. NATIONWIDE REACH.

7 RELIABLE COMMERCIAL SUPPORT

- Clear communication and responsive support
- Practical and commercially aware approach
- Detailed documentation and reporting
- A long-term partner for your sports-surface needs

A PROFESSIONAL AND RESPONSIVE SERVICE.

8 PROVEN RESULTS

- Surfaces for schools, clubs, councils and private facilities
- Built for performance, safety and longevity
- Repeat clients and long-term relationships
- A track record of quality, reliability and value

QUALITY SURFACES. LASTING PARTNERSHIPS.

9 A LONG-TERM PARTNER

- Focused on long-term performance, not just installation
- Ongoing support and guidance
- Advice on maintenance and future requirements
- Committed to helping you get the best from your facility

MORE THAN AN INSTALLER. A LONG-TERM PARTNER.

PROJECT SUPPORT & DELIVERY

UK & IRELAND COVERAGE, LOGISTICS & COMMERCIAL COORDINATION

PIMCO PROSURFACE™ provides commercial and sports-surface solutions across the UK and Ireland. We work with main contractors, local authorities, schools, sports clubs, leisure operators, developers and private organisations, delivering high-quality synthetic sports surfaces with professional installation, maintenance and restoration support.

From small 5-a-side facilities to large multi-pitch developments, we have the people, equipment and experience to support projects nationwide, with a practical, flexible and solutions-focused approach.

UK & IRELAND OPERATIONS

- ✓ Established operations in the UK and Ireland
- ✓ Local knowledge and on-the-ground support
- ✓ Responsive commercial team
- ✓ Flexible scheduling to ninimise disruption

LOCAL SUPPORT. NATIONAL COVERAGE.

MULTI-SITE MOBILISATION

- ✓ Coordinated delivery across England, Scotland, Wales and Ireland
- ✓ Structured mobilisation for single pitches and multi-site programmes
- ✓ Phased scheduling to minimise disruption to live facilities
- ✓ Consistent quality and safety standards across every region

COORDINATED DELIVERY ACROSS THE UK & IRELAND.

PROJECT LOGISTICS

- ✓ Efficient delivery and transport planning
- ✓ Safe and secure handling of materials and equipment
- ✓ Experienced in working with main contractors and site teams
- ✓ Flexible mobilisation to meet project timelines

ON TIME. ON SITE. READY TO PERFORM.

COMMERCIAL SUPPORT

- ✓ Expert advice from enquiry to completion
- ✓ Clear communication and responsive support
- ✓ Practical, solutions-focused approach
- ✓ Ongoing support for maintenance, restoration and future projects

A PROFESSIONAL AND RELIABLE PARTNER.

"Wherever your project is located, PIMCO PROSURFACE™ brings the same commitment to quality, reliability and professional service."
